About Me

This is Anik Acharjee completed BSc. in Computer Science & Engineering from a reputed Engineering University(CUET), Bangladesh. Over the last Year I've dedicated myself for building my knowledge about frontend web development and did some projects using Javascript, React, and bootstrap. Besides I am working for improving my problem-solving and critical-thinking skills.

Front-End Skills

Good At: JavaScript, ES6, React, Bootstrap, Html5,CSS3, Firebase.

Comfortable At: NextJs, Tailwind,DaisyUI, MongoDB, ExpressJs, Git.

Improving: TypeScript, Saas, MUI, Data Structures, Algorithm.

Projects

Niks Moto Manufacturer

niksmoto is a manufacturing company that produces motorcycle parts and wholesales them via their website Visit niksmoto Here.

- Niksmoto is designed such a way that buyers and admins can have different dashboard and no one can access inside without verifying his identity..
- Lead the full development alone, website architecture, API integration, backend data connection with mongodb and firebase authentication.
- This project is built using ReactJs, Bootstrap, Firebase Auth, MongoDB, and ExpressJs. Live Website Client-Side-Github Server-Side-Github

Duds Fashion Inventory

Duds Fashion Inventory manages its inventory by adding, managing, and updating products. This website is only available for admins and restricted to common users. Visit DudsFashion Here.

- This project is built by react and react-router-dom where a protected route system is implemented for security purposes.
- I lead the project alone handling frontend and backend alone where data is secured by jwt standard.
- This project is only for admins who belonging the business and can CRUD the inventory. Normal users can view the homepage and blog and about page.
